

## **Commercial Galvanized Chain-Link Fence Systems**

Developed to meet the rigorous requirements of commercial and industrial applications, these Diamond systems offer years of maintenance-free, long lasting protection. All steel components are protected by zinc coating, which is a proven anti-corrosion technology used for more than 20 years.

**Applications:**Galvanized commercial chain link fence systems have been preferred for decades to define property lines and enclose government and business facilities, as well as protect and add value to commercial property. For privacy, different types of decorative polyethylene and aluminum slats, available in a variety of colors, can be added create an attractive screen.

### **Features and Benefits:**

- Commercial chain link fence systems are commonly used because they are durable and easy to install.
- All steel components of a Master-Halco galvanized chain link fence system are hot-dip zinc coated and guaranteed with a 12 year coating warranty.
- Zinc is an element that is applied to steel in molten form, creating a coating that protects the steel from rusting.
- Many of the fittings used in commercial fence systems are made from malleable steel and cast iron for durability.
- Ties used to attach the chain link fabric to the framework between terminal posts are made from aluminum, resulting in maintenance-free security.

### **Material Specifications:**

- 12 Warranty System
- 12 Year Warranty System with Decorative Slats

Permafused II, the next generation in color chain link fence systems, offers unparalleled performance over ordinary systems, featuring a new polyolefin coating.

This revolutionary coating offers superior adhesion between the galvanized steel substrate and the exterior coating without the need of a solvent based primer, making the product extremely environmentally friendly. Its outstanding resistance to ultra violet light and corrosive environments prevents premature fading and decay.

**Applications:** Diamond's Permafused II is the perfect choice for commercial property owners who need the strength and protection of a chain link fence system plus an appearance that blends in beautifully with the environment. Permafused II is the perfect choice for applications where security, protection from corrosion, and the durability that you would expect from a quality chain link color system are important. For privacy, choose from different types of decorative polyethylene slats tinted to match the shades of Permafused II color chain link systems.

**Features and Benefits:**

- Outstanding performance in highly corrosive environments provides years of protection.
- Excellent long-term adhesion without the use of a primer makes Permafused II one of the most environmentally friendly color systems available on the market.
- High impact resistance reduces the chance of damage during product handling and installation
- Exceptional resistance to ultra violet light prevents premature fading.
- Extreme flexibility reduces susceptibility to cracking and chipping, even in changing weather conditions.
- 15 year limited warranty provides confidence and assurance that you've selected one of the best color chain-link fence systems available.

**Warranty:**

15 Year Permafused II System Warranty
